Tidbits for stuff to make and do mostly for science. Like 'handy' lab equipment. Maybe not so much complete plans or state of the art. Maybe just stuff I may be thinking about to contribute to something else.

Please beware, even for technical purposes, stuff here may be more than just reasonably oversimplified. Assumptions may be incorrect. Citing or quoting such information as more than mere inspiration for other concepts, which may then be even more wrong, is very strongly discouraged. Quoting without full context is especially very strongly discouraged.

Usage

Explore the directories to find 'pdf', 'txt', scriptedIllustrator scripts, etc.

Safety

Stuff here may not have had adequate due diligence for any possibility, feasibility, usability, or safe uses. Your accident is your accident.
